Product Quality Promise

All products have been tested and certified to the relevant British and European Standards - BS715:1993, BS5871 and BS EN 1856 Part 2 where required.

Delivery & Service

All products are supplied fully assembled to enable easy fitting. No special tools are required. All products are available on a next day delivery (UK Mainland).

Static Anti-Down Draught Cowls

Junior Cowl

The Junior Cowl has been tested and approved to BS715 : 1993 and against BS EN 1856 Part 2. It comes fully assembled, complete with a bird guard in Terracotta mild steel or a Stainless Steel finish. Suitable for all fuel applications. For solid fuel installations we recommend the Stainless Steel version, painted terracotta, if fitted to a chimney pot

- Certified to BS715:1993
- Fully assembled
- Optional bolt fixing

NB. Adaptor Plates available for flue sizes 125mm - 200mm

Mad Cowl

The MAD Cowl has been tested and approved to BS715 : 1993 and against BS EN 1856 Part 2. It comes fully assembled, complete with a rectangular stainless steel bird guard. The MAD cowl offers greater protection against down draught conditions. Available with hook bolt fixing or Strap fixing in a terracotta finish.

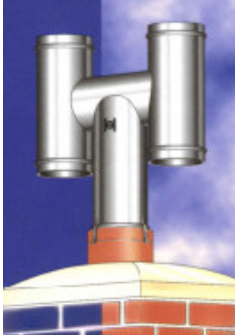

- Tested to BS715 : 1993
- Available in terracotta finish
- Fully assembled complete with bird guard
- Two fixing methods available

NB. Adaptor Plates available for flue sizes 125mm - 200mm

O.H. Cowl

Only the genuine "O.H." cowl has the exclusive design, which converts down-draught into an updraught - no matter how strong or gusty the wind may be. REFUSE IMITATIONS! Look for the registered trade mark.

- Galvanised Steel model available in 100 - 225mm
- Aluminium / Stainless Steel model for Gas available in 100 - 150mm
- Stainless Steel model available in 100 - 225mm

Steel Top (Vedette Cowl)

The Steel Top or Vedette Cowl as it is traditionally known is recommended by many appliance manufacturers to help with the up draught on oil and solid fuel installations.

- 316 Stainless Steel with mesh for all fuels

Spinning Anti-Down Draught Cowls

Spinner Cowl

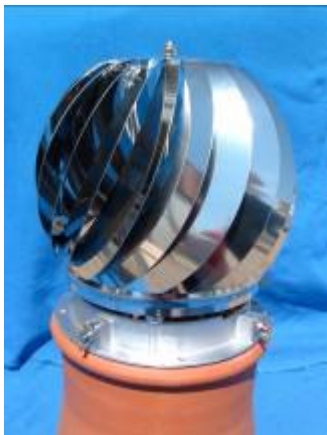

The New Mad Spinner cowl is a British made revolving cowl designed to eradicate downdraught whilst the rotating action assists ventilation. Being made in house in the UK allows us to control all the manufacture of this very technical cowl whilst ensuring only prime materials are used in the production process.

- Suitable for Wood/Solid Fuel/Gas
- Terracotta finish
- Fully assembled ready to fit
- Bolt fixing included
- Tested to BS715 & BSEN 1856
- Suits 5"-10" Internal diameter pots
- Stainless Steel Fin Structure
- Painted Base increases protection

Aspirotor

This spinning cowl is fully certified to BS715 : 1993 Manufactured in 316 grade stainless steel and available in two sizes to accommodate flue sizes from 115 - 235mm internal diameters. Both the Spinner Cowl and Aspirotor offer the best protection against down draught.

- Fully assembled – no bird guard required
- Hinged for easy opening
- Unique and patented product
- ASP150 – Fits sizes 115 – 180mm
- ASP 200 – Fits sizes 175 – 235mm

Birdguards

Pot Hanger Cowl

This cowl has been developed as a result of feedback from customers who wanted a combined Pot Hanger/bird guard with an easy installation method they can have total confidence in. It is manufactured totally from stainless steel with a terracotta finish and comes complete with two fixing straps.

- Suitable for Wood/Solid Fuel
- Terracotta finish
- Fully assembled
- Strap Fixing included
- Available to suit 5" 6" & 7" Diameter MF Liner
- Easy Install – No special tools required
- Supports up to 20m liner

Solid Fuel Bird Guard

The solid fuel bird guard has been specially designed to match in with our pot hanging cowl and offering good rain protection with large square mesh to reduce animal entry and soot build up. Stainless steel, painted terracotta option, offers greater resistance to acid attack.

- Strap fix method
- Fits flue sizes 125-250mm internal diameter
- Available in both mild steel and 316 stainless steel terracotta finish

Bird Guard

This simple wire mesh bird guard can be adjusted to fit inside chimney pots or redundant flue systems keeping out birds and leaves.

- Manufactured from galvanised steel
- Available in 100, 150, 200 and 225mm diameter
- Not suitable for a working chimney

Decorative Bird Guard

This bird guard adjusts to fit all chimney pots or flue systems from 150-225mm internal diameter.

- Available in Terracotta and buff
- Simple fit method – no tools required

Stainless Steel Multi Fuel Bird Guard

Stainless steel birdguard that can be adjusted to fit standard chimney pots up to 250mm internal diameter.

- 2mm stainless steel thick
- 4 fixing legs
- Complete with stainless band fixing
- Cut to suit pot dimensions

Rain Guard

Simple to fit, this product reduces rain and animal entry. Supplied with a stainless steel fixing strap and available in a terracotta finish with a birdguard mesh.

- No special tools required
- Available in terracotta

Multi Fuel Bird Guard

Available in a terracotta finish, this multi-fuel bird guard is designed to prevent animal entry and debris build up.

- Bolt fixing kit available
- Fits flue sizes 125-250mm internal diameter

Euro Topguard

Prevents birds, vermin and leaves entering chimney whilst maintaining flue efficiency. Provides good ventilation and gives added protection against wind and rain.

- Fits 125-250mm chimney pots
- Strap fixing method
- Available in terracotta or buff finishes
- 316 stainless steel models suitable for solid fuel applications

Gas & Oil Flexible Liner Cowls

Uniterm Type B Cowl

The Uniterm Type B Cowl is designed to be installed directly to the top of an existing round chimney and is suitable for domestic Gas fired appliances.

- Tested and Certified to BS715: 1993
- Available in 125mm diameter
- Allows connection of a flexible flueliner through pot

Type B Oil Cowl

Similar to the Uniterm Type B Cowl, this Type B Cowl is suitable for domestic oil fired appliances.

- Available in 100 - 150mm diameter
- Allows connection of a flexible flueliner through pot

Redundant Flues

C-CAP

- Fitted in seconds to any standard round pot up to 280mm dia
- 100% protection from rain, snow, nesting birds etc.
- Helps eliminate wasteful heat loss
- Blends neatly with the traditional character of the stack
- Economical and totally reliable
- Available in terracotta and buff finish
